Appendix 2

A statement stating that the Notice of May 3, 2003 was not received

May 19, 2003

I hereby confirm that the hard copy file and computer records of patent application 09/816,462 have been searched for a copy of Notice to File Corrected Application Papers mailed on May 3, 2003.

Search was extended for possibility of misplacement in the files of other application patents and stored copies of such files.

The document searched was not found.

In view of the above I hereby state that the documents were not received by the applicant.

Haim Melman

Appendix 3

Print of (a) Windows File Manager where patent application files are managed digitally (b) Microsoft Outlook used as tasks reminder

(a)

Please refer to Appendix 3a: A print of Windows File Manager where patent application files are managed digitally.

The left side presents the file directory of this computer.

Patent application 09/398,289, marked by numerical reference 1, is a typical example for my digital records of a patent application. A subdirectory "USA" contains USPTO activity. Subdirectories indicated by numerical reference 2 contain different phases of the application processing such as office actions and appeals.

Numerical reference 3 indicates the present patent application folder.

Under the USA activity for this patent application I would expect to have a directory named "Notice for Correction 3 Apr 2001" (or a similar name).

This folder is missing.

(b)

Please refer to appendix 3b: A print of Microsoft Outlook used as tasks reminder.

Tasks are written there with reminder or without a reminder.

In this page you can see a task indicated by numeric reference 6. This task is related to the present patent application and it is set to launch a reminder on April 14, 2003 at 16:30 hours.

This is the only task found in this Outlook file in reference to the present patent application.
